

Attention: Meanderthal Hike, Snowshoe, and Cross Country Ski Leaders

The CSA has purchased three RESQLINK Locator Beacons for use by Meanderthal outdoor activity leaders who may be taking a group into an area that DOES NOT HAVE CELL PHONE RECEPTION.

In an emergency situation, by activating the unit your GPS coordinates will immediately be sent to the appropriate emergency responders. You must remain in the location from which you sent the signal until help arrives.

These units are located in a safe in the CSA office. A sign out/in book is located on top of the safe, together with simple procedures for use of the units.

Leaders please note that you must plan a day ahead of your activity to pick up the unit during CSA office hours. The office is staffed by volunteers Monday to Friday from 10:00 until noon, and from 1:00 to 3:00 pm. Therefore it will be necessary for you to pick up the device the day prior to your activity, and return it the day after if you return later than 3:00 pm.

Please be prompt in returning units to the safe so that they are available for other users.
